PROFESSIONAL SUMMARY

Innovative Product Designer and AI Builder with 3+ years of experience crafting scalable, user-centered digital products across five countries. Expert in UX/UI design, Webflow development, and design systems. Proficient in vibe-coding full-stack AI-powered SaaS products using Antigravity and the Anthropic Claude API — taking products from concept through design to deployed application. Founder of ContentSplit, an AI content repurposing SaaS built and shipped end-to-end.

SKILLS & TOOLS

Design: UX/UI Design – Wireframing & Prototyping – Design Systems – Mobile App Design – Responsive Design – Usability Testing – Design Thinking

Build: Antigravity – Anthropic Claude API – Vibecoding – Webflow – No-Code / Low-Code – AI-powered SaaS

Tools: Figma – Webflow – Antigravity – Analytics / Conversion Tracking

SoftSkills: Stakeholder Management – Cross-functional Collaboration – Product Strategy – Problem-Solving

WORK EXPERIENCE

Founder & Product Designer / AI:

ContentSplit · Self-Employed · Lagos, Nigeria (Remote) | 2026 – Present

- Founded ContentSplit — an AI-powered SaaS that repurposes long-form blog content into six platform-ready formats: Twitter/X threads, LinkedIn posts, Instagram captions, newsletters, YouTube script intros, and blog summaries.
- Integrated DeepSeek API to automate content transformation workflows, reducing manual content repurposing effort by up to 90% and enabling near real-time generation across multiple channels.
- Built and shipped the entire product independently using Antigravity, accelerating development cycles and reducing time-to-market from idea to launch in under 3 weeks.
- Vibe-coded the entire application solo using Antigravity, managing design and development simultaneously from brief to deployment.

Lead Designer

Nedcomaaks Ltd · Nigeria (Remote) | Jun 2025 – Present

- Led user research and requirements analysis to design digital solutions serving 12,000+ residents across Nedcomaaks and its subsidiary estates.
- Developed the resident mobile application to streamline tenant engagement, service requests, and estate interactions.
- Produced high-fidelity prototypes and a scalable design system ensuring consistency across resident and admin platforms.
- Partnered with stakeholders to validate concepts, incorporate feedback, and align designs with business goals and technical feasibility.
- Improved design consistency and accelerated design iteration through reusable components and standardized workflows.

Lead Designer

TrustPay · Nigeria (Remote) | 2026 – Contract Role

- Led the end-to-end product design for TrustPay, a fintech platform enabling users to convert cryptocurrencies to Naira, send and receive digital assets, purchase airtime and data, pay utility bills, and book flight tickets within a unified experience.
- Designed intuitive user flows across 6+ core financial services, reducing task complexity and improving transaction efficiency through a streamlined, mobile-first interface.
- Created a scalable design system comprising 50+ reusable UI components, ensuring visual consistency and accelerating collaboration between design and engineering.
- Conducted user research, competitor analysis, wireframing, prototyping, and usability testing to identify friction points and improve the overall user experience.
- Partnered with product managers and engineers to translate business requirements into production-ready, developer-friendly designs, helping reduce implementation iterations.

Lead Designer

Solvra · Nigeria (Remote) | 2026 – Contract Role

- Led end-to-end product design for a two-sided marketplace connecting customers with verified service professionals across Nigeria.
- Designed customer, provider, and admin experiences covering onboarding, service booking, escrow payments, verification, ratings, and dispute management.
- Created a scalable design system and product architecture supporting expansion from Lagos to broader African markets.
- Conducted competitor analysis, user research, and product discovery across customer and provider segments.
- Produced product requirements, user flows, wireframes, prototypes, and stakeholder-ready design documentation.
- Collaborated with founders and product stakeholders to define trust and safety mechanisms around verification and payment protection.

Lead Designer

Wolevo · United States (Remote) | 2026 – Contract Role

- Led UX/UI design for a cross-border e-commerce and logistics platform serving Nigeria and Ghana, improving end-to-end shopping flow from checkout to delivery for 10,000+ potential users across early rollout markets.
- Designed and optimized multi-step shipping and fulfillment experience (U.S. warehouse → customs → local delivery), reducing user drop-off by ~28%.
- Improved checkout and address onboarding flow for international purchases, increasing successful order completion rate by ~32%.
- Built a scalable design system for web and mobile interfaces, reducing design-to-development time by ~40% and improving UI consistency across product pages and checkout flows.
- Collaborated with engineering and operations teams to streamline shipping visibility and tracking, improving delivery transparency and reducing customer support tickets by ~25%.

Product Designer / Webflow Developer

Votlax Agency · United Kingdom (Remote) | Mar 2025 – Oct 2025

- Designed and launched 7+ Webflow websites across multiple industries.
- Increased average client engagement by 28% while reducing bounce rates by 18%.
- Established scalable design systems that reduced design-to-development handoff time by 25%.
- Implemented WCAG accessibility standards and SEO best practices across client projects.
- Integrated analytics and conversion tracking to support data-driven optimization.
